

# THE LONG ROAD TO "GOOD AS NEW": INSPECTED, GUARANTEED AND READY TO WORK

It takes a great deal of work and servicing for a used machine to be transformed into a Cat® Certified Used machine. It begins by selecting an ideal machine for the process – one that is well maintained with a low number of service hours. To bring a machine up to our high standards, Cat dealers and their certified service technicians perform a rigorous, head-to-toe inspection of every eligible machine.

A significant investment of time and resources is made, as the machine is examined both inside and out – from cab to undercarriage, engine to transmission, hydraulics to work tools, and more. With an accurate understanding of the complete service history of the machine, each unit is inspected to ensure our customers receive the highest quality equipment. In addition, these machines are serviced using only genuine Cat parts and backed by a Caterpillar warranty to give customers the peace of mind necessary to succeed in their industry.
